March 19, 2023

Dear Colleagues,

I would like to provide the highest evaluation of UroCare hospital, based upon my experience working there. I participated in the Second International Workshop on Bladder Exstrophy in Kampala, hosted at UroCare. This was a hands-on workshop, involving live surgical teaching. The organization and quality of the event was outstanding.

The Educational level of the experience was very well done. The talks were well organized, and were broadcast remotely as well as on site. There was ample time for questions. All audience levels were addressed.

The surgical facilities were also top-notch. Anesthesia, equipment, assistance, and after-care were all provided at a high level to provide good results for the children. Patient experience was always the first concern. All members of the UroCare team worked together to be sure of good results.

The city of Kampala is fortunate to have such a high-quality surgical hospital, advancing specialty care to international levels.

Please contact me with any further questions or clarifications.

Respectfully,

A handwritten signature in black ink that reads "Paul D. Sponseller MD".
